RALE Design System Seminar

1. Short Circuit / Design1 Designing inherently short-circuit-proof, potted safety transformers 12V, 0.166A in accordance with IEC 61558
2. Short Circuit / Design2 Designing inherently current limited, potted safety transformers 10V, 5A in accordance with UL 1585 Class 2
3. Short Circuit / Design3 Designing inherently current limited single phase transformer 24V, 100A with integrated inductor
4. High Voltage/ Design1 Designing high voltage ,potted transformers 10kV, 0.1A, 1500Hz
5. Autotransformer / Design1 Designing mixed operation mode transformer, 230V/115V, 10A in autotransformer and 230V/115V, 10A galvanic separated connection
6. Autotransformer / Design2 Designing three phase autotransformer, for 3x400V/3x380V, 10kVA output power and 25% one phase unsymmetrical load
7. Inrush Current / Design1 Designing three phase, low inrush current universal autotransformer for 3x208V/120V, 50/60Hz, 9A
8. Battery Charger/ Design1 Designing rectifier transformer for battery charger 6Vdc, 40dc
9. Welding/ Design1 Designing rectifier transformer for welding with 26Vdc, 200Adc
10. Audio/ Design1 Designing the audio transformer for loudspeaker 25W, 16_Ohm
11. Capacitor Charger / Design1 Designing flyback transformer for capacitor charger 10kVdc, 0.1 μ F, 50W
12. K-Factor Transformer/ Design 1 Designing a 500 kVA, 60Hz, K-Factor, three phase dry transformer with cooling channels?
13. Rectifier Transformer/ Design 1 Designing a 3 phase, 50/60Hz rectifier transformer (YYD to suppress 5. and 7. harmonics) with 2 parallel connected bridge rectifiers, for $U_{dc} = 400V$ and $I_{dc} = 1000A$
14. Rectifier Transformer/ Design 2 Designing a 12Vdc, 30kAdc Rectifier Transformer
15. Distribution Transformer Designing a 1600kVA/35kVA, 50Hz Distribution Oil Transformer
